July 2010 – June 2011

INTRODUCTION

The Centre for Behavioural Research in Cancer Control commenced in January 2000, part-funded by the Cancer Council WA and Curtin University.

Aim

The aim of the Centre for Behavioural Research in Cancer Control is to increase understanding of the influences on people's behaviours which increase their risk of cancer, and, through this understanding, develop more effective programs to achieve individual and environmental changes that modify these behaviours and hence reduce cancers resulting from these behaviours

Cancer Council WA

The Cancer Council WA, established in 1958, is the premier organisation in WA focusing on cancer control. In 1998, the Cancer Council WA identified the need for the establishment of a behavioural research centre in WA to guide the development, delivery and evaluation of cancer control programs.

Curtin University

The Faculty of Health Sciences at Curtin University successfully bid to partner the Cancer Council WA in the establishment of the Centre for Behavioural Research in Cancer Control. A contract for a three – year term was signed by both parties in mid 2010.

The Faculty of Health Sciences at Curtin is one of the most comprehensive tertiary centres of health study and training in Australia. The Faculty of Health Sciences offers over 100 academic learning programs, more than two thirds of which are for postgraduate study. These courses are offered to over 8,000 students across seven Schools and 12 Research Centres and four Institutes.

The Centre for Behavioural Research in Cancer Control is located at the Curtin Health Research Campus at Shenton Park. It also maintains an office on the Bentley campus in association with the WA Centre for Health Promotion Research, School of Public Health.

The Centre collaborates with the other Australian centres for behavioural research in cancer control in Victoria, New South Wales and Queensland. It has maintained links with the School of Population Health at the University of Western Australia, the Centre for Child Health Research at Edith Cowan University, and has collaboration within Curtin University, particularly with the School of Public Health, WA Centre for Health Promotion Research, National Drug Research Institute, Public Health Advocacy Institute of WA, School of Psychology, the Centre for Developmental Health, and Curtin Health Innovation Research Institute. The Centre for Behavioural Research in Cancer Control staff collaborate on a large number of research projects with partners throughout Australia and internationally (refer to Appendix 1, Summary of CBRCC collaborations, 2011). In addition, staff are represented on numerous local, national and international organisations (refer to 'Other Academic Activities of CBRCC Staff', on page 16+).

DIRECTOR'S REPORT

The Centre for Behavioural Research in Cancer Control acknowledges the support of Professor Jill Downie the Pro-Vice Chancellor, Faculty of Health Sciences, Professor Charles Watson, Professor Sue Fyfe, Professor Garry Allison, Professor Tony Wright and Cancer Council WA and its staff in particular Mr Terry Slevin, Ms Denise Sullivan and CEO Ms Susan Rooney. I also acknowledge the excellent contributions of the Centre's staff, as listed in this Report.

Research program

The 2010-2011 reporting period was very productive for CBRCC with 17 books/book chapters and 29 journal articles accepted for publication; 5 others are under review and several others are in preparation. Nine technical reports were also published during this period along with 4 refereed written conference papers. There were 29 conference presentations in collaboration with members of our research teams, with acceptance of several others for presentation during the second half of 2011.
