2. **CRC Spatial Information - Spatial Health.**

A project to establish and integrate spatial health within the Centre for Research Excellence in Spatial Information (CRC-SI) is led by Professor Semmens and Ms Narelle Mullan (WA DoH). The spatial health program includes collaborative partners in other Australian states who are working within specific priority research areas including Defence, Energy and Utilities, Agriculture and Climate Change, Sustainable Urban Development, Positioning of Locations, and Data Capture and Feature Extraction. Our research program on Spatial Health addresses the development of tools to explore spatially-enabled health information within rural and remote health services. A strong focus is the translation of information output to healthcare practice, policy and planning.

**Lead:** Professor James Semmens

**Team:**
- Ms Narelle Mullins
- Dr Andrew Jardine
- Associate Professor James Boyd
- Associate Professor Anna Ferrante

**Collaborators:**
- Professor Bert Veenendaal, Department of Spatial Sciences, Curtin University
- Prof Geoff West, Spatial Information, Curtin University
- Peter Somerford, Department of Health WA
- Ms Diane Rosman, Department of Health WA
- Ms Carol Garfield, Department of Health WA
- Lesley Arnold, Landgate
- Travis Dedman, Landgate
